

AMEN

The Agency Presentation

We Are Amen

**We are striving
to introduce unreal
ideas into the real
environment of the
internet.**

We work at the intersection of top-notch design and unorthodox technologies, and serve as a one-stop shop for both startups, bringing their ideas into reality, established companies, helping them leverage design solutions to lower operational costs, boost security, and achieve transparency.

**We provide
the following
services:**

Our Vision

The main aim — to help you maximize your revenues, stay on the competitive edge, and keep your customers satisfied. We go beyond design and development and bring into existence the most innovative and daring solutions.

We make amazing things happen.

Amen goes beyond design and development, bringing into existence daring and modern solutions to provide an effective digital presence.

We believe in Human-Centered Design — A philosophy for design creation focused on the needs, behaviors, and challenges of users. We use this approach to get users to buy a product or service by bringing their needs to the forefront, and it totally works.

Projects Implemented

Our Work

We take pride in every one of our clients and projects.

Once our paths cross, together we can invent something truly unique.

Project name:

Fireside Outdoor

About Client

Fireside Outdoor — Engineer products that make managing an outdoor fire easier and safer.

The client was already selling products at Amazon, eBay & other ecommerce platforms but didn't have his own ecommerce website.

THE GOAL was to successfully sell directly from their own website.

<https://firesideoutdoor.com/>

What We Did

Firstly, we designed landing pages for main products of the company with easy-to-read interactive descriptions.

Then we brought there functionality of an online store and made it user-friendly and easy to search and buy as a result in an intuitive way.

Services Included:

User Experience

ULTIMATE SURFACE PROTECTION
FOR THE TRUE NO TRACE EXPERIENCE

The Pop-Up Pit Heat Shield allows the Pop-Up pit to be used on heat-sensitive surfaces. Our aerospace inspired heat shield reflects heat and allows the ground to stay cool.

Avoid scorched ground or grass and truly leave no trace. Designed exclusively for use with the Fireside Outdoor Pop-Up Pit. Always follow all Federal, State, and Local regulations.

NEW

Project name:

Princeton Hydro

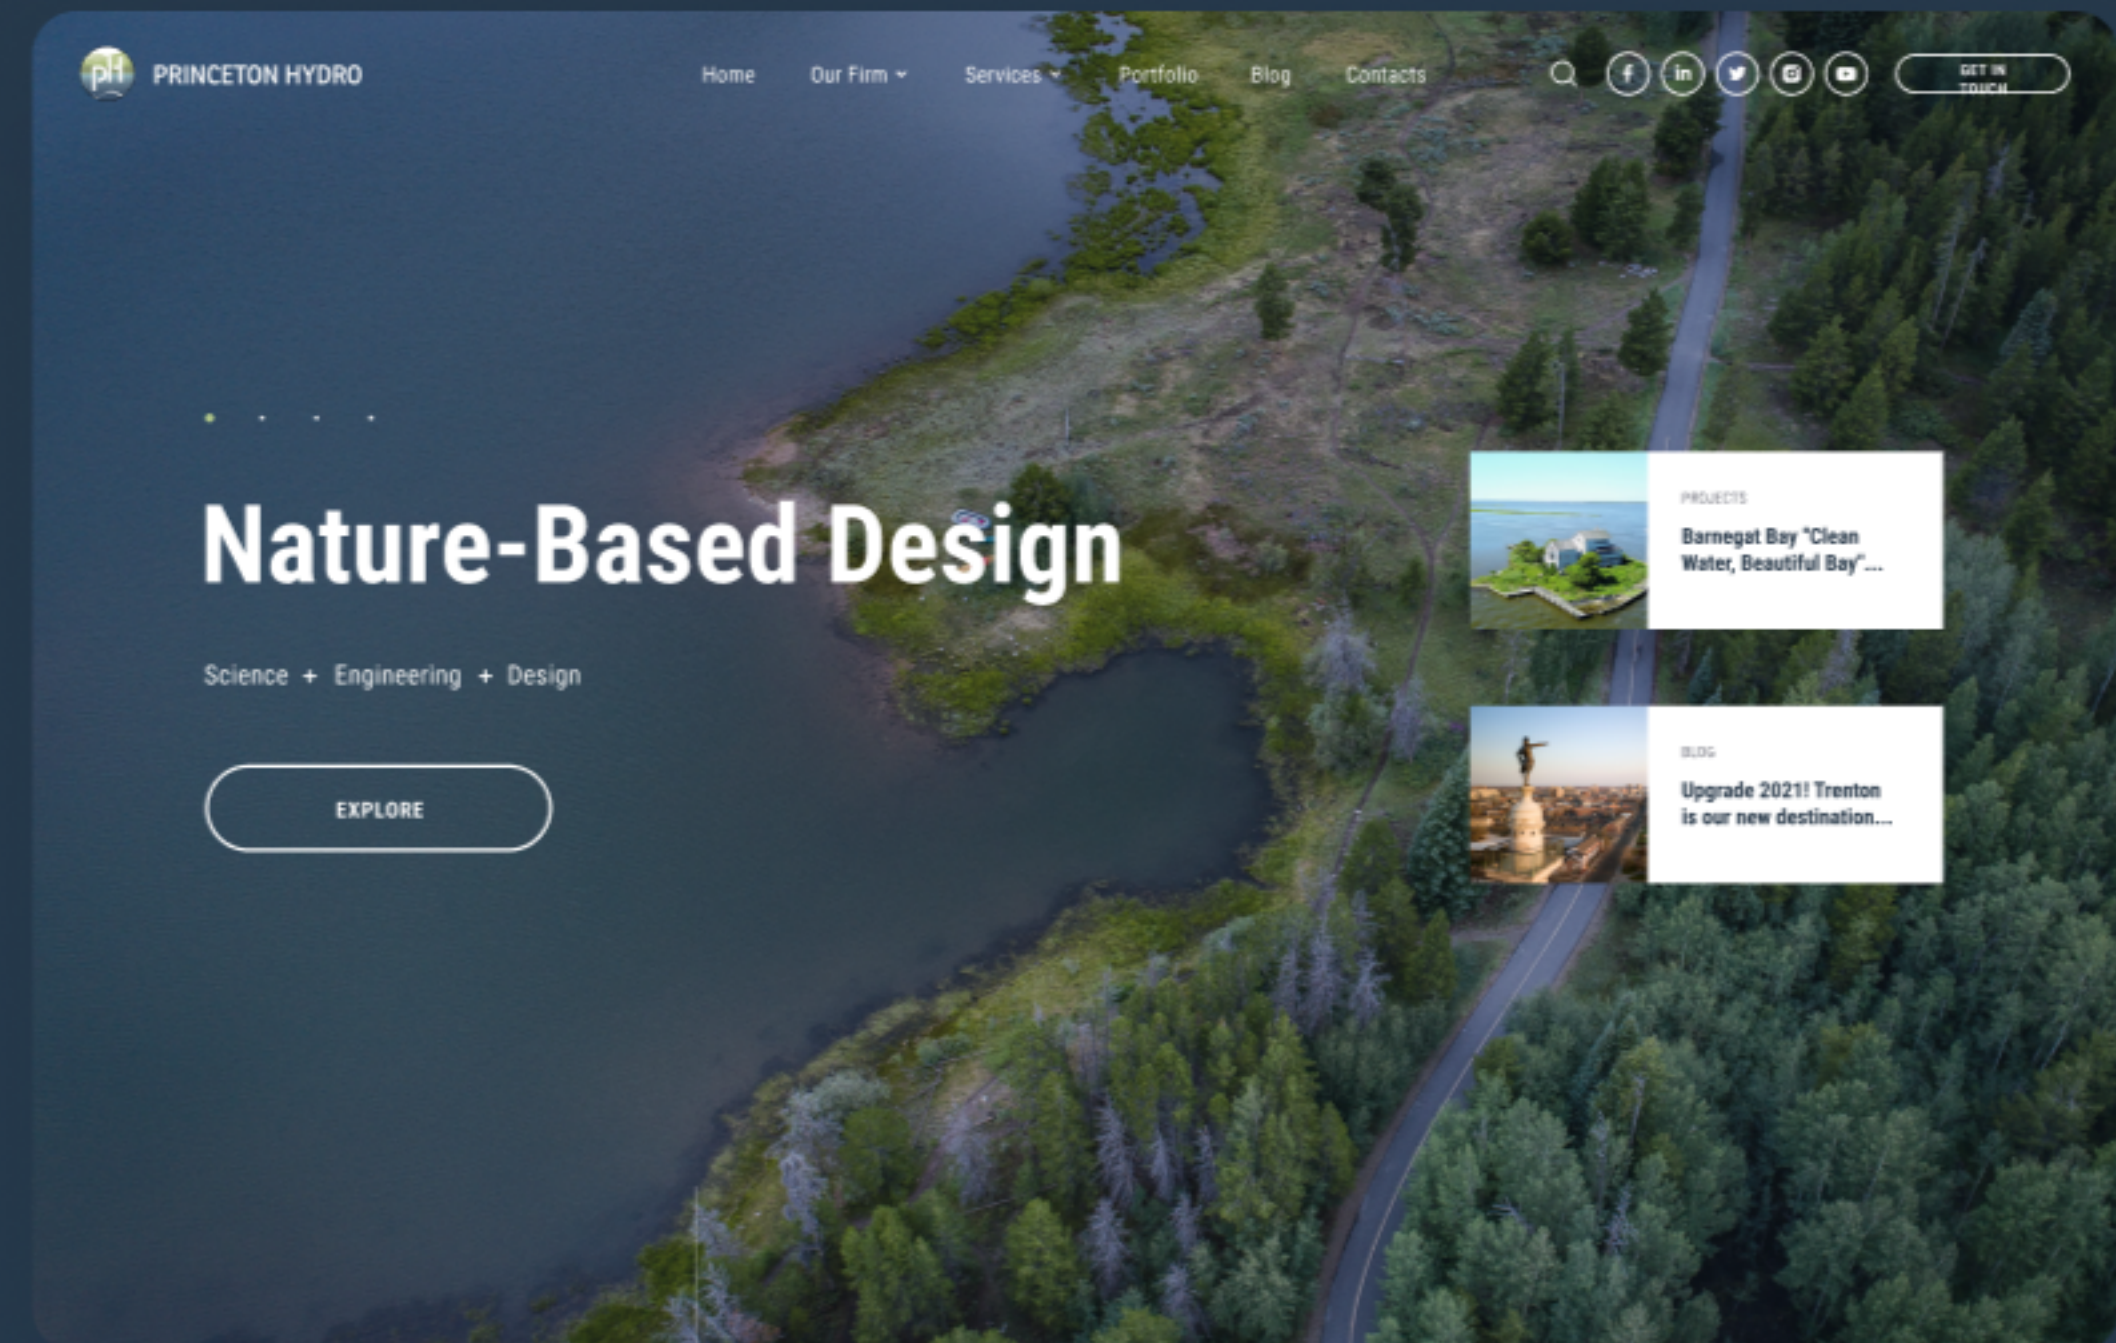

About Client

Princeton Hydro has provided intelligent solutions for environmental consulting, ecological restoration, water resources, and geotechnical engineering since 1998.

This serious project offers expertise in aquatic and terrestrial ecology, water resources engineering, and geotechnical investigations.

THE GOAL was to refresh an old website in a modern way and to give a taste of the vision and strengths of the company.

<https://princetonhydro.com/>

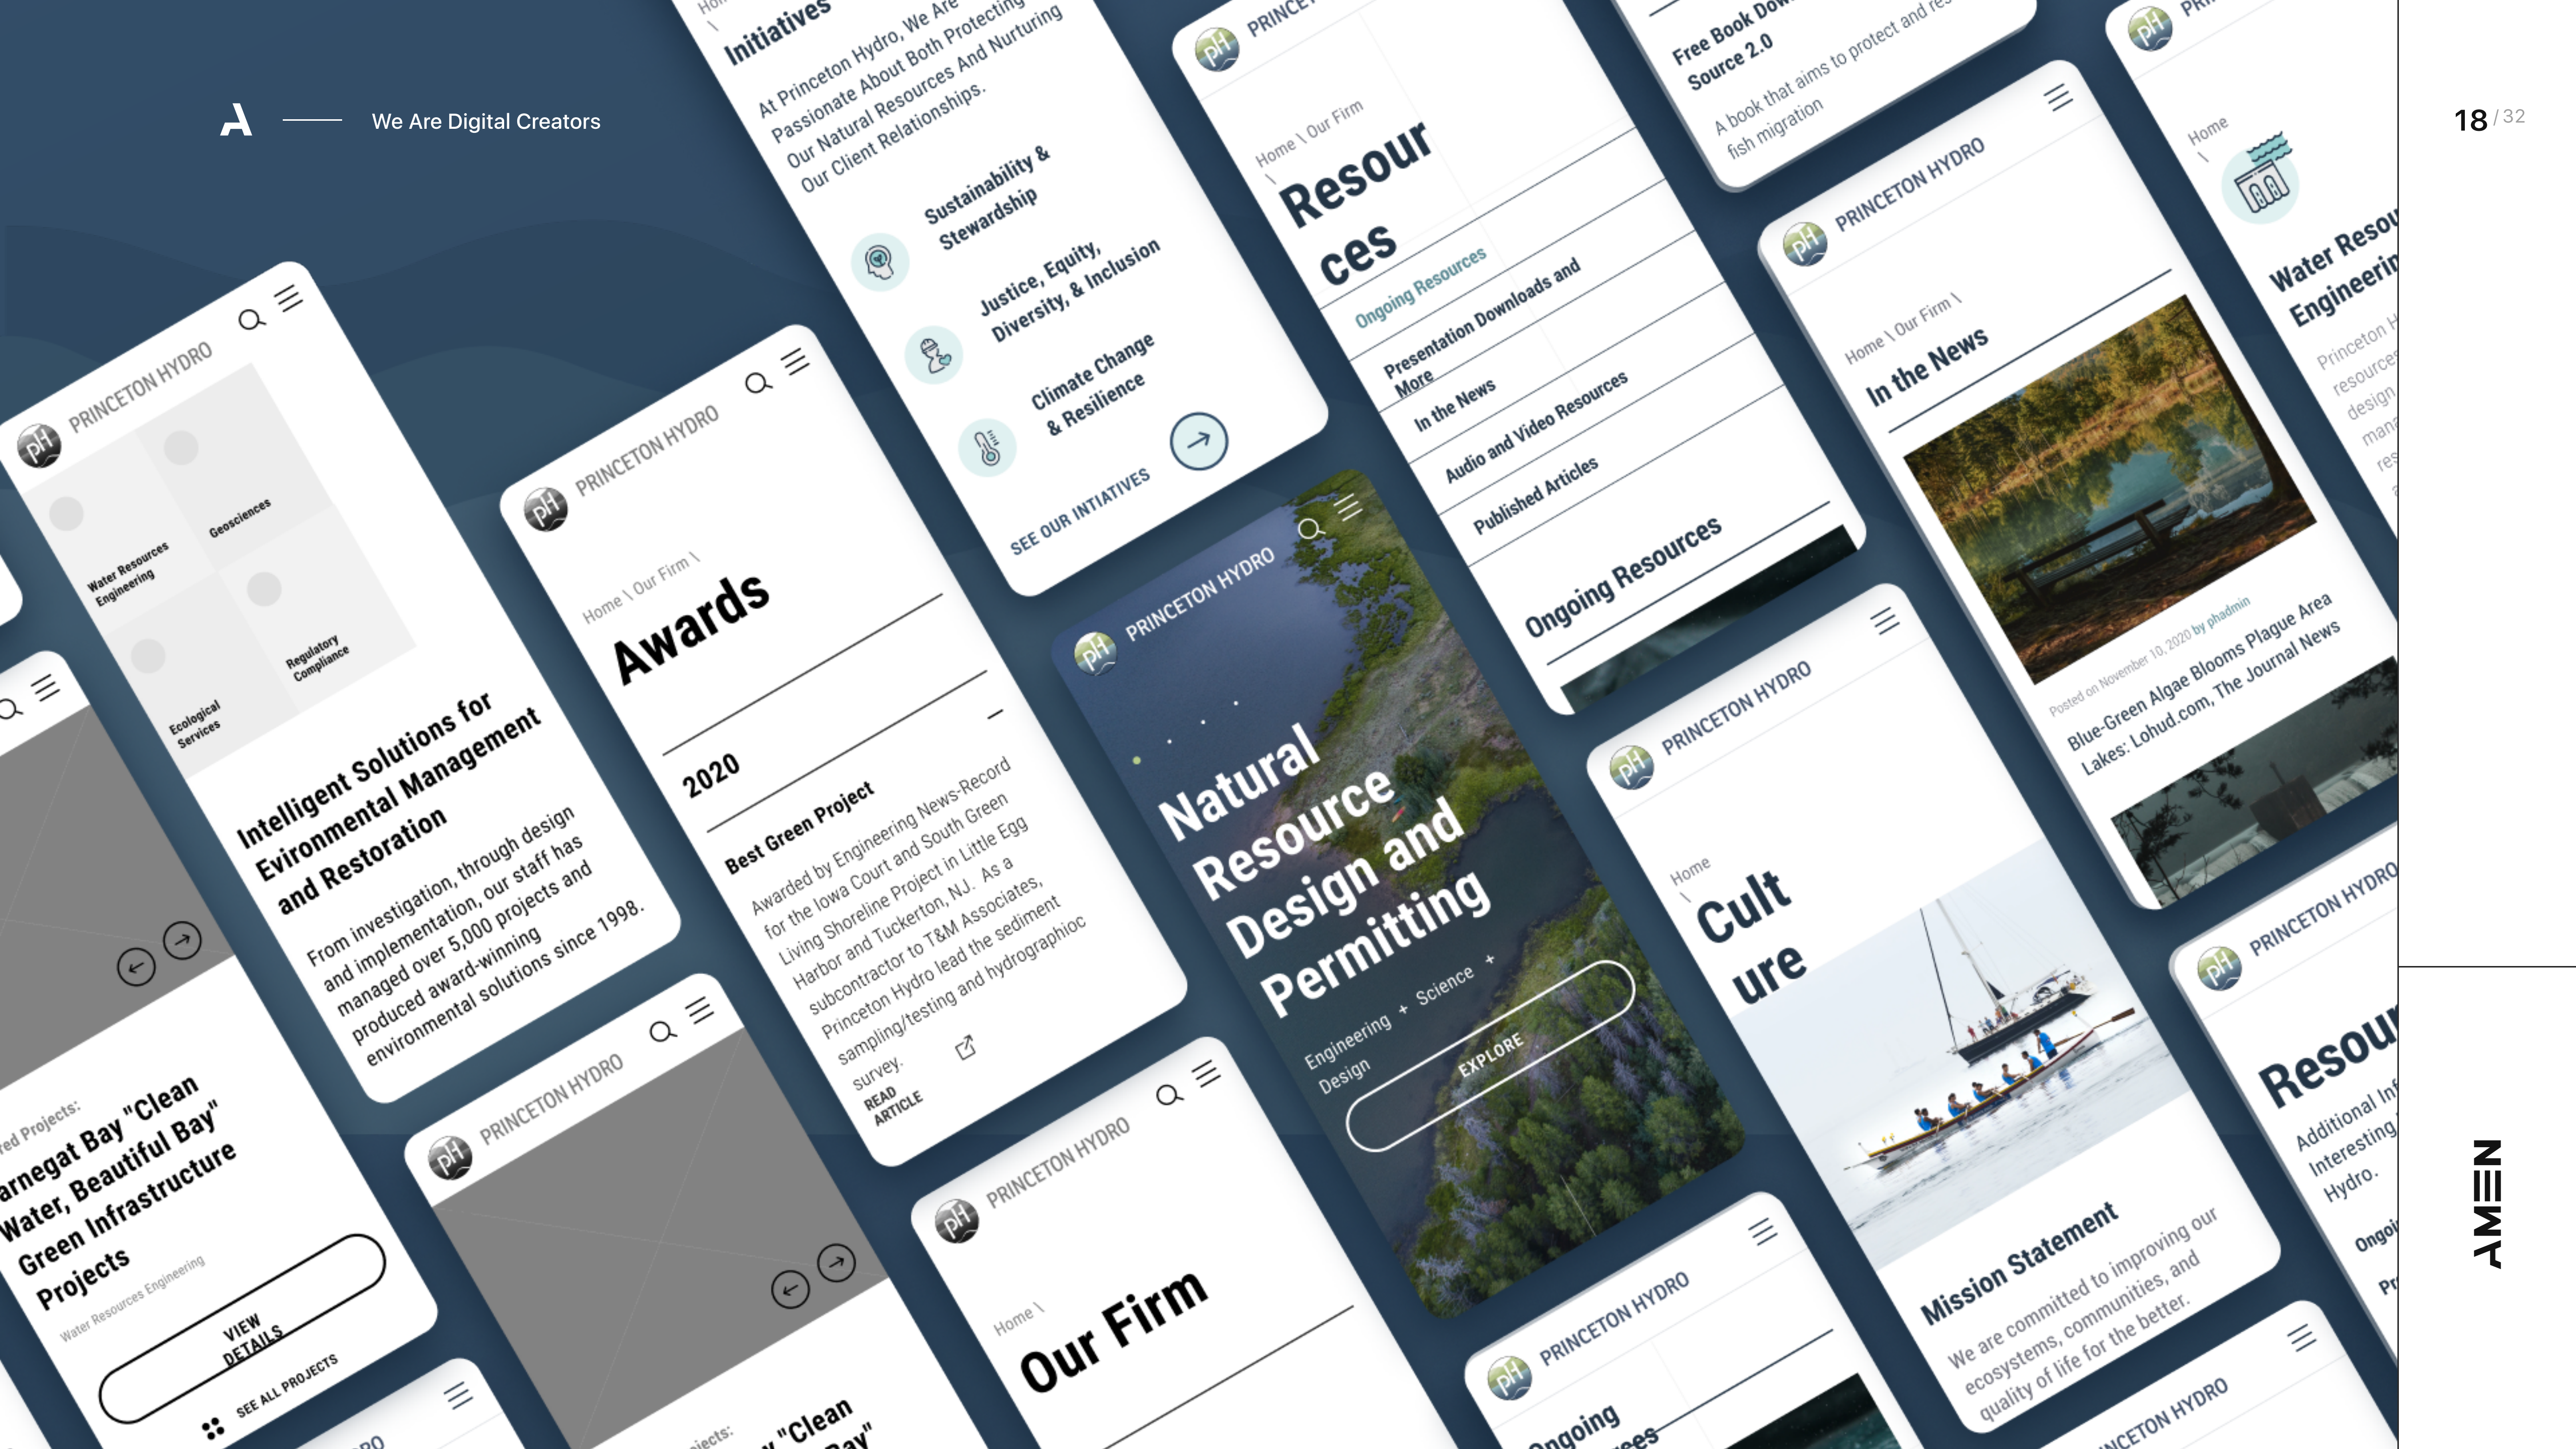

What We Did

To enhance the effect of perception of company strengths and values we chose to use such modern and effective solution as animation.

Also, we have implemented new user-friendly navigation with easy-to-use structure.

Services Included:

-  **User Experience**
-  **Front-End**
-  **User Interface**
-  **Back-End**

Project name:

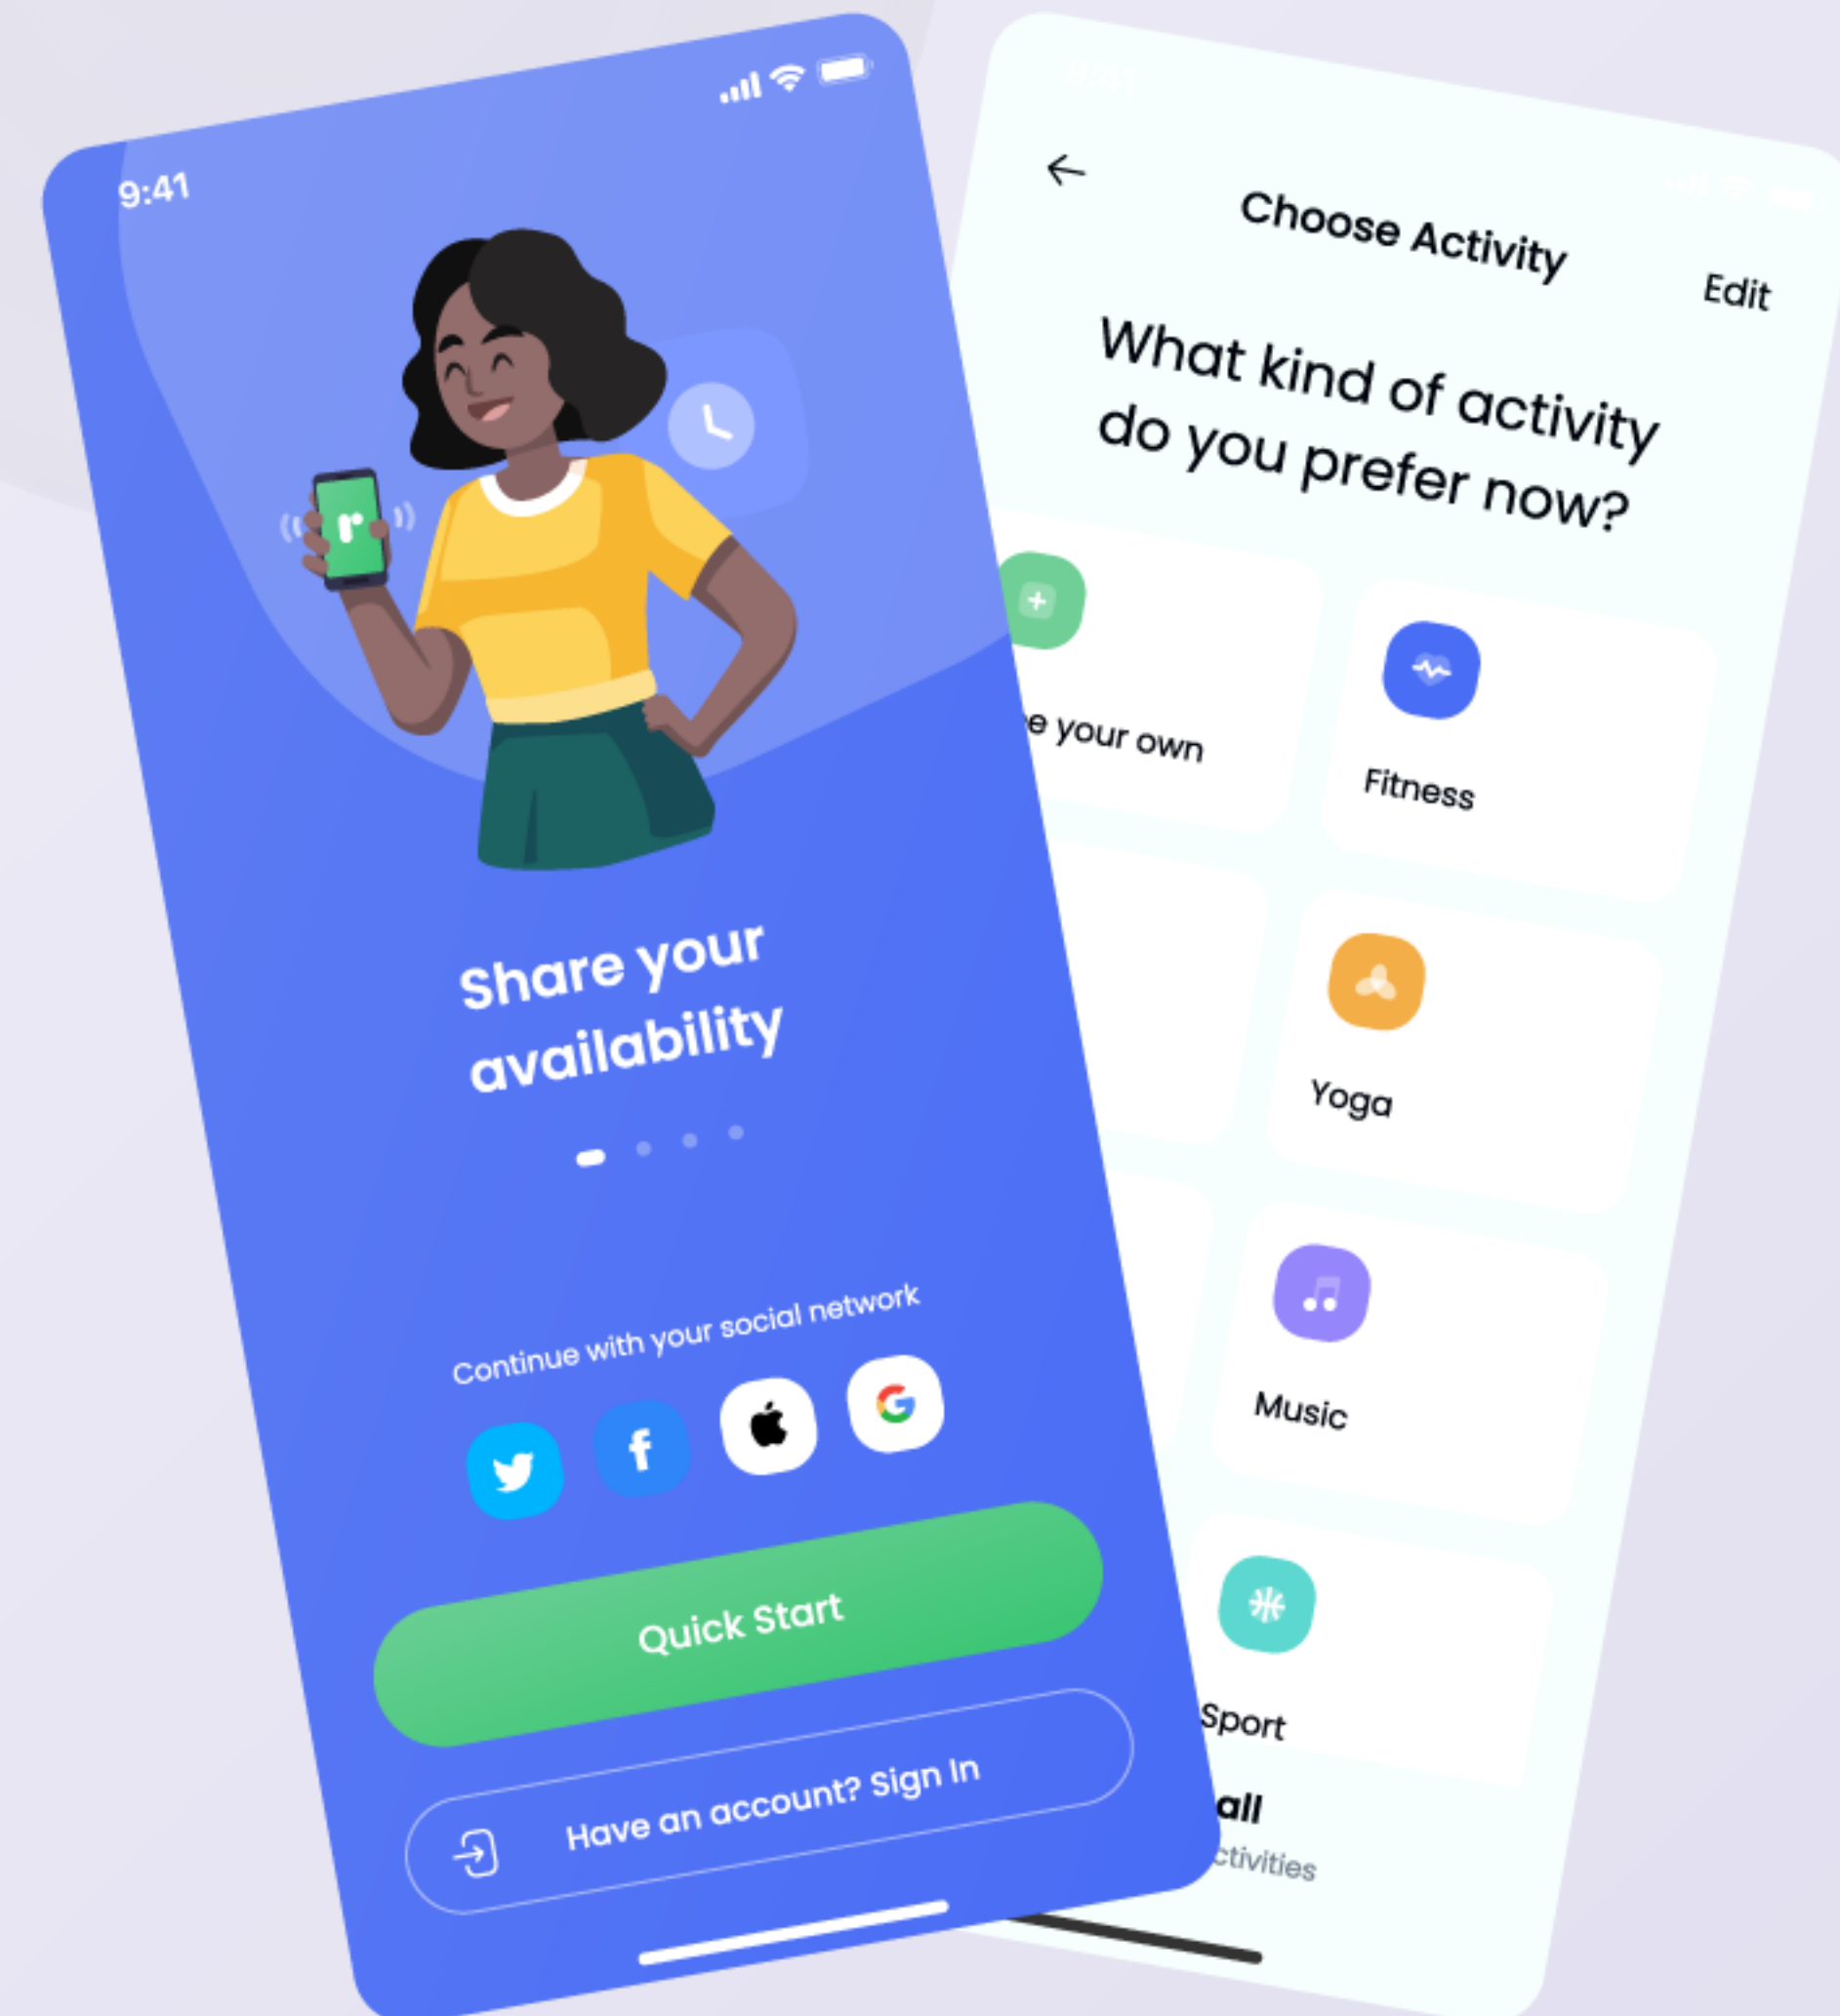

Redy App

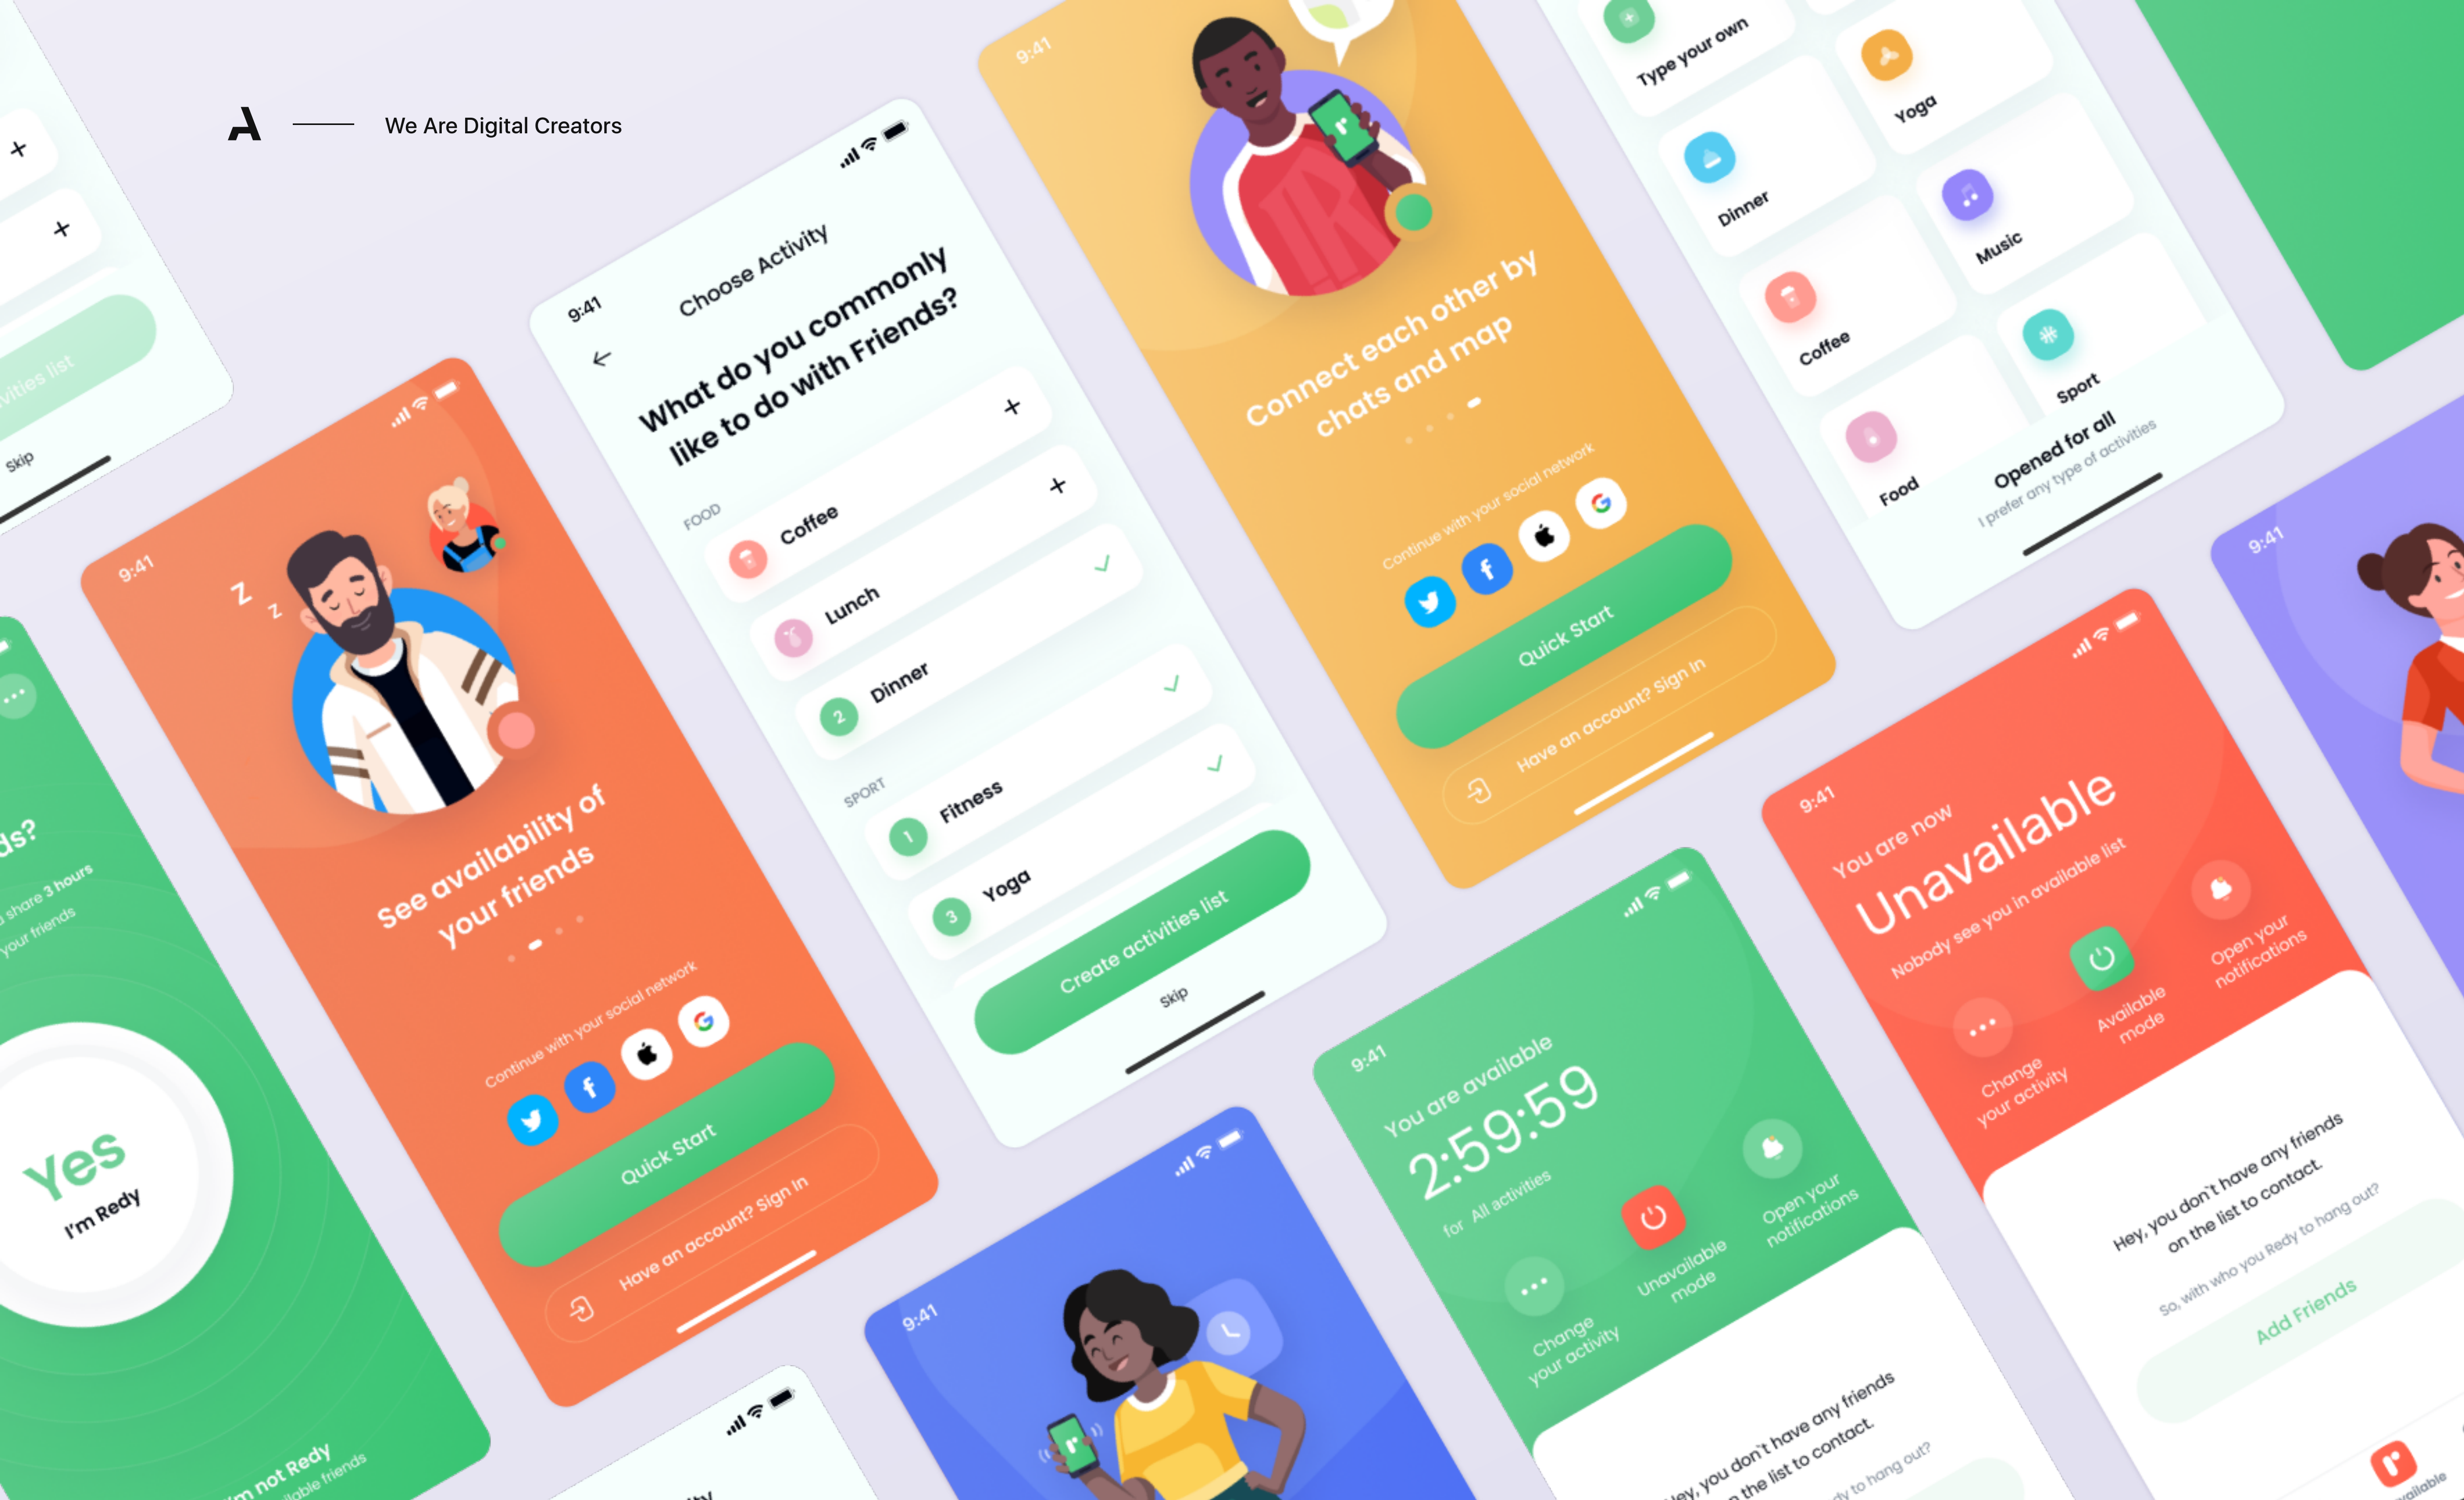

About Client

The central problem that Redy app is trying to solve is that it takes effort to contact your friends to hang out.

The app will provide a simple way of broadcasting your availability to hang out at the given moment.
Current availability to hang out.

THE GOAL was to create an app design from scratch.

Project name:

Thankya

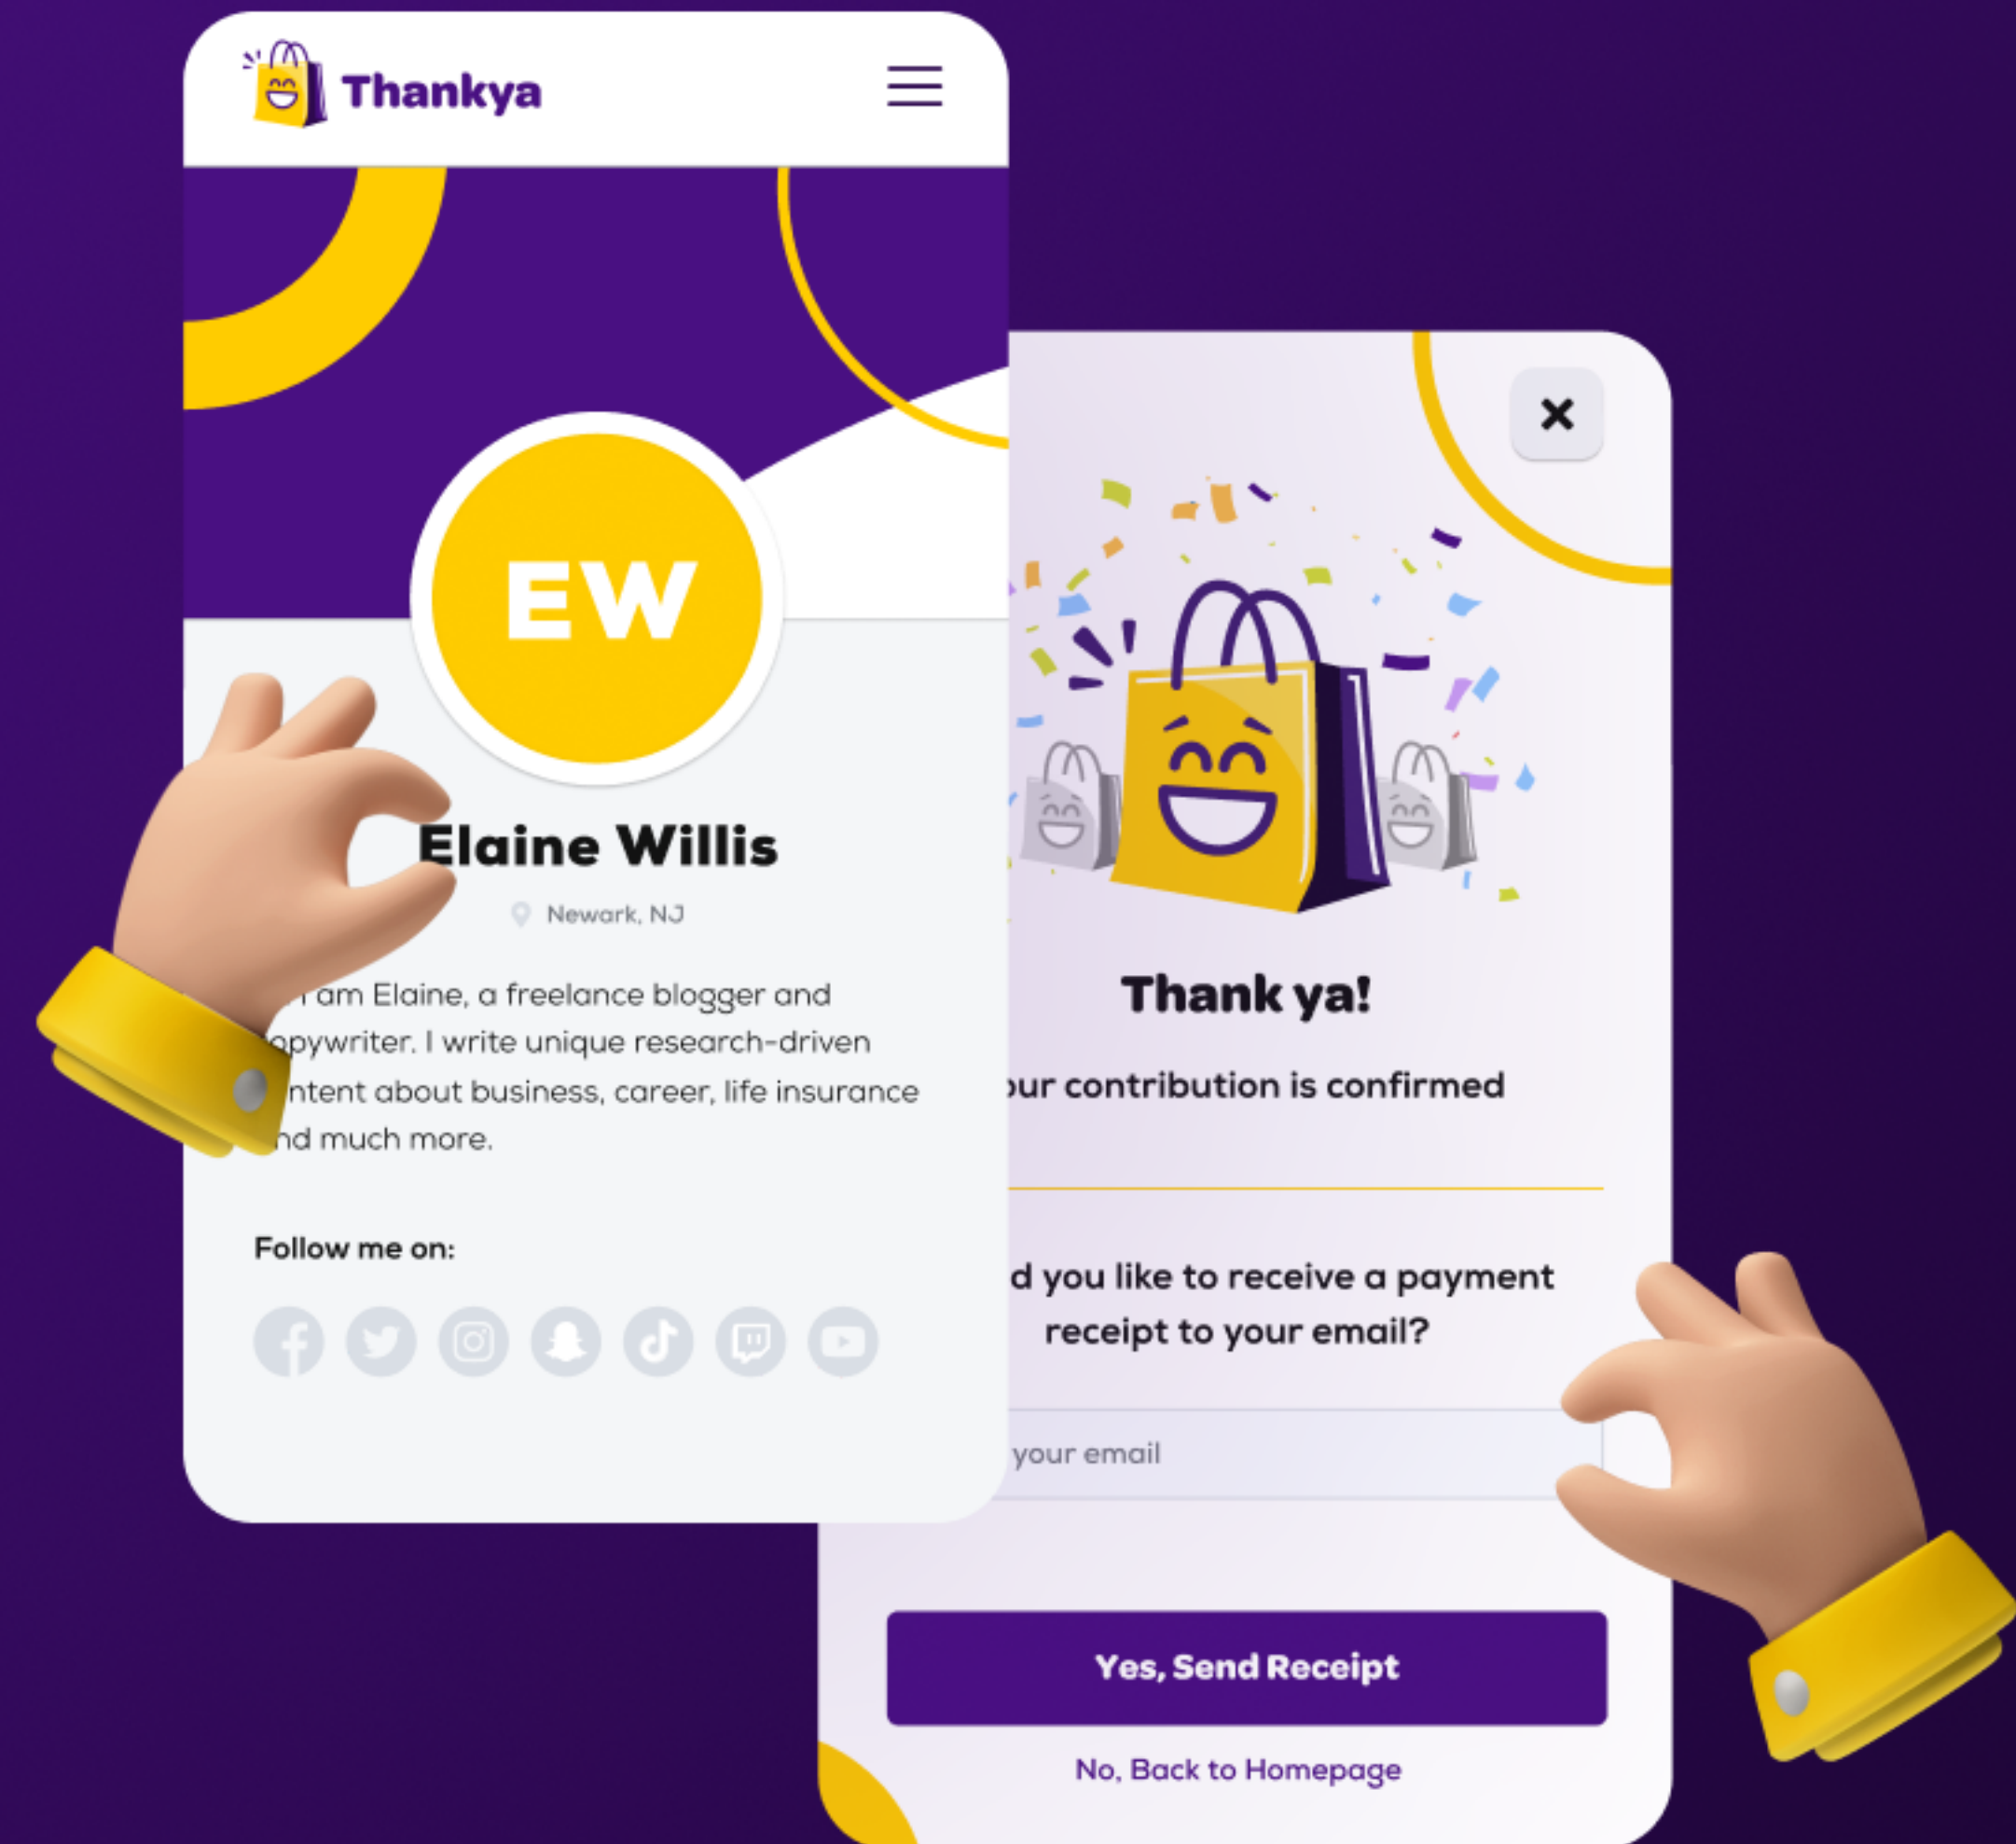

About Client

Thankya is the shopping platform that lets friends, family, and fans chip in, so the request owner could get exactly what is wanted.

The requester could raise money on their own needs as a new laptop or guitar lessons, whatever is needed to be happier.

THE GOAL was to create a web application design from scratch.

<https://thankya.com/>

What We Did

We started from the customer research and based on its results built a functional, the most friendly and easy-to-use prototype of the app.

Recording to the project and users needs, we did specifically web application design.

Services Included:

 **User Experience**

 **User Interface**

Project name:

Arcanium

About Client

Arcanium was founded to help startups achieve ambitious goals. The talent pool is built around entrepreneurial tech teams with solutions architects, project managers, developers and designers.

Product roadmap workshops, technical audits, idea-to-MVP services, on-demand team extension, and recruiting. That's all about the Arcanium ecosystem.

THE GOAL was to build awesome and original motion website design.

<https://www.arcanium.io/>

What We Did

To begin with, we structured the information and created 2 types of stylistics which have been realized to process all the necessary customer requirements for the design of the site.

Then based on the selected one we created a new representable website design. To implement it we used custom illustrations, motion design, animations, including micro animations of icons.

Services Included:

 **User Experience**

 **User Interface**

 **Motion Design**

We Are Digital Creators
